# Accelerate your RF innovations

RF technology enables innovations in 5G and 6G, satellite communications, automotive, and more. Measurement solutions, software, and services from Keysight help you design, emulate, and test your designs with accurate and results that save time and reduce risk.

Keysight is proud to be Platinum sponsor for the 19th consecutive year and we look forward to working with you to tackle the world's toughest  $\mu$ Wave and mmWave test challenges.

The European Microwave Week 2022 organisers would like to thank the following companies for their help and valued support throughout this year's event.

---

PLATINUM SPONSOR

# Welcome to the 25th European Microwave Week

This is the 25th anniversary of European Microwave Week (EuMW) as this year's event takes place in Milan 25-30 September. The last time the event was in Milan was 20 years ago in 2002. Milan is the business and financial center of Italy along with a long history of creativity so offers a great setting to host EuMW 2022. The venue is Milano Convention Center (MiCo) so there is a wide range of transport options available for travel to MiCo Milan – air, rail network, tube, and cable car or walking/cycling.

The theme for EuMW 2022 is "Creative Microwaves" – as colleagues and fellow professionals can be inspired by Milan, as it happened to Leonardo da Vinci during the years that he worked in this vibrant European city creating some of his masterpieces. This is the reason that theDomoMilano4.jpg Vitruvian Man was chosen for the logo of EuMW 2022. The event is made up of three co-located conferences:

- The European Microwave Conference (EuMC)
- The European Microwave Integrated Circuits Conference (EuMIC)
- The European Radar Conference (EuRAD)

In addition, EuMW 2022 includes The Forum on Defence, Security and Space, The Automotive Forum, The From 5G to 6G Forum and the industry exhibition. EuMW 2022 provides the opportunity to participate in conferences, workshops, short courses and special sessions.

## CONFERENCES

With a large number of submissions, close to 600 regular papers, and an acceptance rate of 66%, the Technical Program Committee was able to form 75 regular sessions, 7 focused sessions, and five poster sessions according to General TPC Chair, Maurizio Bozzi. In addition, there are five special sessions: one special session in Memoriam of Prof. Vittorio Rizzoli, one organized in collaboration with the European Association on Antennas and Propagation, and three geographical special sessions (devoted to the microwave research in Asia Pacific region, India, and North Africa). The program also includes two inter-society technology panels, organized in collaboration with the IEEE Microwave Theory and Technology Society (MTT-S): one panel is devoted to biomedical applications and the other is related to emerging materials, and both panels feature worldwide known authorities with differ-

ent scientific background, ready for stimulating discussions with the audience.

Six opening and closing sessions complete the program, leading to the total round number of 100 technical sessions. The conference program includes technical sessions on traditional topics (like filters, power amplifiers, and antennas) as well as sessions on emerging technologies (like multi-physics modeling, additive manufacturing, THz systems, and automotive radars).

The EuMC takes place 27-29 September and is Europe's largest conference dedicated to microwave, mmWave and terahertz devices, systems and technologies and will give you opportunities to share and discuss your recent findings with peers and experts in the field. A broad range of high frequency related topics, from materials and technologies to integrated circuits, systems and applications will be addressed in all their aspects: theory, simulation, design, and measurement.

The 17th EuMIC is part of the European Microwave Week 2022. Initiated by the GAAS® Association in 1990 and renamed in 2006, the conference is being held from 26-27 September. The EuMIC conference is jointly organized by the GAAS® Association and EuMA and is the premier European technical conference for RF and microwave electronics, and opto-electronics. It has established itself as a key contributor to the success of the overall European Microwave Week and remains the largest scientific event in Europe related to microwave integrated circuits.

The 19th EuRAD will be held from the 28-30 of September also as part of the European Microwave Week 2022. This Radar Conference is the major European event for the present status and the future trends in the field of radar research, technology, system design and applications. The EuRAD conference will bring together a global network of researchers, practitioners and institutes working on topics related to the following four areas of focus: Radar Sub-systems and Phenomenology, Radar Techniques, Radar Architecture and Systems and Radar Applications. The Women in Microwave Engineering event is co-sponsored by the IEEE MTT-S and will take place at the beautiful location of Pinacoteca

Ambrosiana. The event includes a technical session followed by a visit to the museum taking place on 28 September. This year the Women in Microwaves session, entitled: "Wearable devices: engineering meets creativity" with three excellent talks by international women scientists.

Students and young professionals are strongly encouraged to attend with many activities that have been organized specifically for them such as two Doctoral Schools (one focused on Microwaves for Emerging Medical Technologies and the other on building a FMCW radar), a Three Minute Thesis competition, an IEEE Young Professional technical session, the Career Platform, prizes and grants, student helpers' program and a networking event.

## FORUMS

The Automotive Forum takes place 26 September with a focus on Automotive Radar Sensors and Testing. The first 77 GHz automotive radar sensors entered the European market in 1999 and in 2019, EuMA organized the Automotive Forum for the first time to provide an open platform for industrial experts to discuss technical aspects, concepts and radar architectures as well as market issues in the area of microwaves in the automotive industry. This year's forum consists of a good mix of technical presentations, plenary and panel discussions as well as networking time. This year's event will focus on the following topics:

- Recent progress of imaging RADARs
- Radar interference challenges and solutions
- Radar interference testing and market prospects
- Novel Radar trends and innovations

The forum is mainly devoted to technical experts from automotive industry throughout the whole supply chain. Keynote speakers will present their views on special technical solutions as well as regulatory or strategic issues.

The Defence, Security, and Space (DSS) Forum takes place on 28 September and focuses on key technologies of the modern defense systems using the electromagnetic spectrum including radars, electronic support measure systems, electronic countermeasures systems, and platforms for cyber security. In this context, the

keynote speakers will consider the state of the art of leading technologies and systems, the estimated evolution of technologies and trends and consider expected capabilities and functionalities to address future challenges. The Industry Session will reflect the effort and investment that is being made to innovate/develop radar and electronic defense technologies and will be given during a "Lunch and Learn" session with free box lunches provided by Microwave Journal. The DSS Forum "Future Radar Technology Round Table" will be a moderator lead discussion with radar industry experts discussing the future of radar systems and electronic defense platforms enabled by new semiconductor technologies, faster digital processing speeds and extended memory, better thermal designs/materials, new simulation/testing capabilities and new software capabilities such as artificial intelligence and machine learning for cognitive systems. The experts will review these new capabilities and project how these underlying improvements will shape future radar systems and multi-function platforms.

The From 5G to 6G Forum takes place 29 September and takes a deep dive into the important research trends that will permit the evolution of services from 5G to 6G with a clear focus on the RF technologies that will enable the use of the mmWave and sub-THz bands. The Forum consists of a full day session with invited speakers from industry, operators and vendors, and academy. The forum covers all aspects related to integration of communication and sensing, the novel Electromagnetic Information Theory, aspects to improve coverage and performance of mmWave networks. The presence of leading

operators and 5G leading vendors together with academy will permit setting the scene in terms of requirements, long term vision and most important research trends. The Forum will include a panel session, coffee breaks and box lunches.

### WORKSHOPS AND SHORT COURSES

This year features a short course about Fundamentals of Microwave Power Amplifier Design and 30 workshops in the most interesting fields within the microwave industry, reflecting the areas of all the three conferences taking place during the week (EuMC, EuMIC, and EuRAD). Workshop topics include emerging applications such as quantum computing, with two different workshops focused on the cryogenic RF/mmWave technology, metrology and other emerging microwave techniques for quantum computing. Several workshops tackle 6G communication systems from different perspectives, including both architecture and system aspects as well as all its main technological challenges, from semiconductor to integration technologies. Specific sessions also address radars, automotive and space-related aspects, including the access-to-space topic. Others are devoted to healthcare and biomedical applications with four dedicated workshops tackling the last advancements on topics such as dosimetry and micro-dosimetry for the estimation of the exposure of human bodies to the EM radiation, new sensors for medical applications, nanoparticles in medicine and the innovative use of radars in this area. Several workshops are also dedicated to foundational topics such as filters, arrays and innovative manufacturing techniques. EuMIC and EuRAD workshops are concentrated on Sunday and Friday, respectively. EuMC workshops are

spread throughout Sunday, Monday and Friday.

### EXHIBITION

Don't miss the exhibition, not only to get closer to the latest products in the field, but also to get together and meet colleagues, establishing new connections, or bringing new life to old collaborations. The exhibition will feature close to 200 companies featuring the latest devices/components, test & measurement equipment, simulation/modeling software, materials/PCBs and more. Keysight Technologies and Rohde & Schwarz have the largest stands in the middle of the exhibition and the exhibition has many local companies and representatives from Italy that you might not see in other countries so take advantage of that and visit them. See the demonstrations and special displays to learn more about the products and services that are available from exhibiting companies. Note that the MicroApps is cancelled this year but will return next year in Berlin. See you in Milan!

# Travel Information

## GETTING TO THE MICO - MILANO CONVENTION CENTRE

A wide range of transport options are available to travel to Milan – air, rail network, tube, and cable car or walking/cycling. The main entrance for European Microwave Week 2022 is MiCo South, Level 1 which is accessed from Gate 2. There is also access to Level 1 from Gate 16.

### VENUE ADDRESS

Allianz MiCo  
Piazzale Carlo Magno, 1  
20149 Milano

Milan is served by high-speed trains, and a very efficient underground and surface transport system. Many points of interest of Milan are at walking distance from MiCo. You can get to MiCo - Milano Congressi by Bus, Metro, Train or Light Rail. These are the lines and routes that have stops nearby:

Bus: 48, 78, 90, 91, Z301

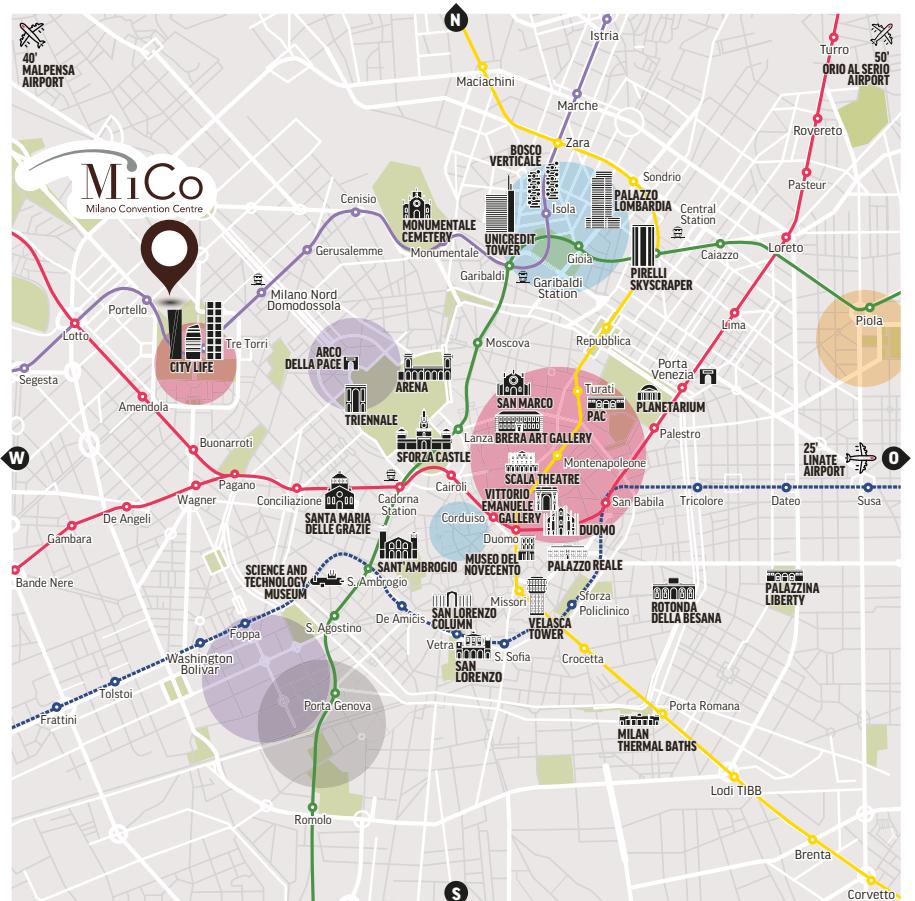

Train: R17, S4

Metro: M5

Light Rail: 19

For more information, please visit  
<https://www.micomilano.it/en>

## HOTEL RESERVATION

Horizon House has teamed up with Connex Hotels and Events, our official hotel booking supplier, to offer you the ability to book your accommodation for EuMW at the most competitive rates available. It is very easy to make an immediate hotel booking.

Simply visit their booking page:

<http://www.connexhotelsandevents.com/eumw-milan.html>  
and make your booking,

or email:

[sally@connexhotelsandevents.com](mailto:sally@connexhotelsandevents.com).

You will find a wide range of accommodation to suit every budget. Alternatively, see the hotel booking pages within this programme.

## PERSONAL INVITATION (VISA)

A valid passport will be required for entry into the organising country, in this case Italy. An Italian visa may also be required for the purpose of attending EuMW and we suggest you check with your local embassy. If you are registering as a speaker, a delegate or an exhibitor and you need a visa, we recommend that you contact the Italian Embassy, in your own country at least 3 months prior to EuMW.

The organisers will be pleased to send a letter of invitation to any speaker, exhibitor or conference delegate requesting it to assist with their visa application.

In order to request a letter of invitation, please download and complete the request form found here: <https://www.eumweek.com/visitors/passport-visa.html> and send it to the visa operational officer: [visas@eumw2022.org](mailto:visas@eumw2022.org).

# Local Information and Insurance

## WI-FI

Wi-Fi is available in the exhibition hall and conference area. Login details can be found within your delegate bag.

## ELECTRICITY

Electricity is supplied at 240V, 50 Hz.

## CREDIT CARDS

All major hotels and most restaurants and shops will accept credit cards. It is advisable to carry other identification as well. Visa and MasterCard are the most widely accepted cards.

## HISTORY & SIGHTSEEING

Milan is the undisputed business and financial capital of Italy, it is also home of the financial markets and is the base

for all of the country's multinationals, making Milan a confirmed international metropolis. Its fine aesthetic traditions are upheld in new projects carried out in the city by star architects. Among the many fascinating monuments, it is worth mentioning the Duomo di Milano, the world's largest Gothic cathedral, the Sforza Castle, La Scala theatre, the Church of Santa Maria delle Grazie with the Last Supper painting of Leonardo da Vinci. The city also enjoys an enviable setting in Lombardy. Filled with enchanting art cities, this is the Italian region with the largest natural parks and splendid lakes surrounded by mountains and is a paradise for both mountaineers and skiers. The region's strong attachment to its longstanding traditions is reflected in the unforgettable flavours of internationally renowned local cuisine and wine.

For more information, visit <https://www.yesmilano.it/en>.

# Conference Information

## BADGES AND REGISTRATION

The registration area will be located near the main entrance to MiCo South on level 1 accessed from Gate 2 as signposted. There is also access from Gate 16. Online registrants will automatically be e-mailed their badge barcode and an order confirmation receipt immediately after they pay. All those who have pre-registered should bring their badge barcode and confirmation with them to the conference where they can print out their badge by scanning their barcode at the Fast Track desk onsite. Processing will be quick and easy but queues may form at busy times, so please arrange to collect your badge well in advance of your first conference session. Those who have not pre-registered can do so on site until 30<sup>th</sup> September 2022. There will be on-site registration terminals located within the registration area, where delegates can enter their details and pay immediately by swiping their credit or debit cards through the card readers attached to the terminals. Alternatively, you can pay at the Cashier desk if you require a printed receipt. If you have any questions regarding registration procedures and payment, please email: eumwreg@aventri.com.

## CONFERENCE ROOMS

Conference rooms are located on level 2 of the venue as signposted. The conferences will be held in different rooms over the conference dates. Please refer to the Conference Matrix in this booklet for a detailed overview. Delegates can register for one, two or all three of the conferences. Registration at one conference does not allow any access to other conference sessions. Those who wish to register for two or more conferences will receive a discount on these registrations.

## INSURANCE

It is highly recommended that all participants carry the proper travel and health insurance, as the organiser cannot accept any liability for any accident, illness, or injury that occur during or when travelling to the event. Please also insure that personal items are covered for loss, damage or theft either through a personal policy or by a corporate policy. We cannot accept any liability for personal items that are lost, damaged or stolen during or travelling to and from European Microwave Week 2022.

## INTERACTIVE SESSIONS

The interactive poster papers will be presented on electronic screens, which are located in the exhibition area as signposted on Tuesday, Wednesday and Thursday.

## EXHIBITION HOURS

The exhibition area will be located in MiCo South on Level 0 as shown on the Floor Plan in this booklet. As a registered delegate you will have full access to the exhibition area.

The exhibition opening hours are:

- Tuesday 27<sup>th</sup> September 2022, 9:00 - 18:00
- Wednesday 28<sup>th</sup> September 2022, 9:00 - 17:30
- Thursday 29<sup>th</sup> September 2022, 9:00 - 16:30

See the back cover for a full listing of the exhibitors (correct at the time of going to press).

## CONFERENCE PROCEEDINGS

All papers published for presentation at your chosen conference will be available to download from an online repository. Four weeks prior to the event, downloading instructions will be communicated to conference registrants.

### TECHNICAL WORKSHOPS

This series of seminars highlights the high potentialities of the ANSYS numerical tools and how they can play a strategic role in the modern designer's working practice.

The seminars touch different topics, such as the new capabilities of modern numerical tools to more efficiently model RF devices, as well as new approaches based on Machine Learning and Metamodel. How to take into account with high accuracy the chip and its package coupling and interaction or the effects of thermo-electro-mechanical stress on RF circuit performance will be demonstrated. The benefits of using numerical modeling to implement a virtual testing environment to assess the survivability as well as the relationship between component and system-level modeling both for space applications will be explored. Finally, different approaches to handle electromagnetic issues, ranging from electromagnetic environmental effects in aerospace, or EMI/EMC issues on PCBs, or the assessment of human exposure to radiation will be deeply investigated.

#### TUESDAY 27<sup>TH</sup> SEPTEMBER, 2022

10:00	<b>The Right Time to Simulate is NOW! A journey in the new simulation technologies for RF Applications</b>
11:00	Domenico Loricchio
11:30	<b>Application of Machine Learning to EMI problems in Aerospace and Defense Industry</b>
12:30	Giancarlo Guida
14:30	<b>RFIC fully coupled Chip-Package co-extraction</b>
15:30	Marco Occhiali
16:00	<b>Multiphysics Simulation Approach for 5G Filter Design</b>
17:00	Alberto Di Maria

#### WEDNESDAY, 28<sup>TH</sup> SEPTEMBER, 2022

10:00	<b>Survivability of RF Devices to Space Weather: Radiation hardening and Charging effects</b>
11:00	Giancarlo Guida
11:30	<b>Signal &amp; Power Integrity and EMC analysis of Telecommunication PCBs</b>
12:30	Flavio Calvano
14:30	<b>From Component to Mission: Simulation as must-have for aerospace &amp; defense industry (HFSS &amp; STK)</b>
15:30	Domenico Loricchio
16:00	<b>Leverage the Power of Automation with PyAEDT! A free fall in the new python library for Ansys Electronics Desktop</b>
17:00	Alberto Di Maria

#### THURSDAY, 29<sup>TH</sup> SEPTEMBER, 2022

10:00	<b>Signal &amp; Power Integrity and EMC analysis of Telecommunication PCBs</b>
11:00	Marco Occhiali
11:30	<b>Electromagnetic Environmental Effects in Aerospace and Defense Industry</b>
12:30	Giancarlo Guida
14:30	<b>Back to School: Take your Ansys usage to the next level with Ansys Electronics Desktop Student</b>
15:30	Domenico Loricchio
16:00	<b>Human Exposure to 5G Radiation: Challenges and opportunities from numerical simulations</b>
17:00	Domenico Loricchio

# Exhibitor Directory

## A1 Microwave

Stand B13

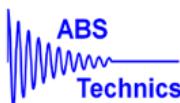

Stand Personnel:

Microwave filters in coaxial and waveguide for military and commercial applications.

Westgate Carr Rd, Pickering YO18 8LX, UK

Email: sales@al1microwave.com

Website: <https://al1microwave.com/>

## ABS Technics BV

Stand A6

Stand Personnel: Johan Kenis

ABS Technics BV designs and produces microwave absorber materials for a broad range of applications. Absorber materials are produced from different base materials such as urethane and silicone elastomers, foams, thermoplastics and other specific materials which are modified to obtain microwave absorption properties.

Emiel Becquaertlaan 2 / Bus 1.4 / B-2400 Mol / Belgium

Email: [info@abstechnics.com](mailto:info@abstechnics.com)

Website: [www.abstechnics.com](http://www.abstechnics.com)

## Active Technologies srl

Stand F32

Stand Personnel: Michele Ramponi, Roberto Foddis, Stefano Parma

Active Technologies is an Italian company focused in producing very high-quality Arbitrary Waveform Generators and Pulse Generators. Our R&D department works in a very close co-operation with our customers, solving complex experimental systems demanded by several markets like Semiconductor and Aerospace & Defence. Our AWG-5000 is the fastest 16-bit AWG in the market and we offer up to 8 analog channels in a single instrument. Adding RF Mode option, we can reach 12.32GS/s of sampling rate with a 5Vpp amplitude.

*via Bela Bartok 29B - 44124 Ferrara (FE) - Italy*

Email: [info@activetechnologies.it](mailto:info@activetechnologies.it)

Website: [www.activetechnologies.it](http://www.activetechnologies.it)

## AGC

Stand B33

Stand Personnel: Antonio Furlone, Duane Mackenzie, Anthony Pascalet

"AGC Group ([www.agc.com](http://www.agc.com)) is a leading innovator and supplier of high technology, low loss base materials for 5G, Autonomous Transportation, Space, Aviation, Defence and Medical Device industries. Our well-known brands include Taconic™ and Nelco™ Copper Clad Laminates (CCL). Global technical support, supported by our production and R&D bases in France, US, Singapore, Korea and Japan and our competence in PCB technology, makes AGC your ideal partner in the design and manufacture of various high-tech RF, Digital and Mmwave solutions."

ROUTE DES USINES - 65300 LANNEMEZAN - FRANCE

Email: [mc.recruit@agc.com](mailto:mc.recruit@agc.com)

Website: [www.agc-multimaterial.com](http://www.agc-multimaterial.com)

## Alfa Microonde srl

Stand B13

Stand Personnel: Claudio Marziali, Gaia Duprè

Representative company specialized in Microwave and digital components, sub systems and systems. The company is capable of supporting design.

Via Santa Bernadette 76, 00167 Rome Italy

Email: [info@alfamicroonde.com](mailto:info@alfamicroonde.com)

Website: [www.alfamicroonde.com](http://www.alfamicroonde.com)

## ALPHA-RLH

Stand B7

Stand Personnel: Thomas COLOMBEAU / David BALAGEA

The ALPHA-RLH French Competitiveness Cluster works with companies and laboratories in setting up, evaluating and funding innovative projects. It also provides support to SME members internationalizing and exporting to global markets. ALPHA-RLH is structured around three key Strategic Fields of Activity: Photonics-Lasers, Microwaves-Electronics and Materials, with the support of digital tools, for four applied markets: Health, Communication-Security, Aeronautics-Space-Defense and Energy-Smart Buildings. Based in Bordeaux, Limoges, La Rochelle and Pau, the cluster has 283 members.

Institut d'Optique d'Aquitaine - Rue François Mitterrand - 33400 TALENCE - FRANCE

Email: [contact@alpha-rlh.com](mailto:contact@alpha-rlh.com)

Website: <https://www.alpha-rlh.com/eng>

## Altum RF

Stand B18

Stand Personnel: Greg Baker, Niels Kramer, Sofija van der Loo, Oliver Kanzler

Altum RF designs high-performance RF to millimeter-wave semiconductor solutions for next generation markets and applications. Our engineers use decades of modeling expertise and system applications knowledge to define the right products for the most challenging requirements. Using proven technologies like GaAs and GaN, we deliver optimal products in terms of RF performance, level of integration and cost. Whether your project is for Telecom, 5G, Satcom, RADAR Sensors, Test & Measurement, Aerospace & Defense or ISM applications, discover Altum RF as your next RF semiconductor partner.

De Zaale 11, 5612 AJ Eindhoven, The Netherlands

Email: [info@altumrf.com](mailto:info@altumrf.com)

Website: [www.altumrf.com](http://www.altumrf.com)

## AMCAD Engineering

Stand E18

Stand Personnel: Zacharia Ouardirhi

AMCAD Engineering offers the most advanced solutions of characterization and modelling of RF and Microwave devices for different customers. AMCAD proposes solutions for Foundries to measure and extract accurate models for their transistors to reach first-pass design successfully, for OEM to improve their circuit design cycle through a streamlined and standardized measurement process, and for Systems Designers to anticipate real-life system performances and optimize their specifications early in the design cycle. Product showcased: IVCAD, IQSTAR, VISION, Whiteboard, PIV, STAN.

20 rue Atlantis, Bat Galileo, 87068 LIMOGES, FRANCE

Tel. +33 (0)555 040 531

Web: [www.amcad-engineering.com](http://www.amcad-engineering.com)

## American Microwave Corporation

Stand A17

Stand Personnel: Bernd Rupp, Caroline Lommer

Solid state control components to 40GHz, PIN diode switches SPST-SP65T, variable attenuators, DLVAs, power divider

7430 Merritt Park Drive, Suite 140 Manassas, Virginia 20109

Email: [Info@RUPPtronik.de](mailto:Info@RUPPtronik.de)

Website: [www.RUPPtonik.de](http://www.RUPPtonik.de)

## American Standard Circuits, Inc.

Stand C10

Stand Personnel: Anaya Vardya and John Bushie

American Standard Circuits (ASC) prides itself on being a total solutions provider, manufacturing quality rigid, metal-backed, RF/microwave, flex, and rigid-flex PCBs for the medical, automotive, industrial, defense, and aerospace markets in volumes from test and prototypes to large production orders. ASC has the expertise to provide a wide variety of technologies in a time-critical environment. Their qualifications include AS9100 Rev D, ISO 9001:2015, MIL-PRF 31032, MIL-PRF-55110 and MIL-PRF-50884 certification.

## Ampleon

Stand B36

Stand Personnel: Olli Hariju, Rob Bouwer, Houssem Schuick, Rob Vermeulen, Coen Centen, Dietmar Veith, Natascha Jellema

Ampleon is shaped by more than 50 years of RF Power leadership. The company envisions to make the world a better place through innovation in high frequency applications based on the advanced LDMOS and GaN technologies. Ampleon has more than 1,600 employees worldwide, dedicated to enable their customers to be successful with RF Power products. Its innovative, yet consistent portfolio offers products and solutions for 4G LTE and 5G NR infrastructure, industrial, scientific, medical, broadcast, aerospace, and defense applications.

# DEFENCE, SECURITY & SPACE FORUM AT EUROPEAN MICROWAVE WEEK

Organized by

Wednesday  
28 September 2022  
Milano Convention Ctr.  
Room Brown 3  
Chairs:  
Danilo Orlando and Alfonso Farina

**09:00-10:40**

## EuRAD Opening Session

**10:40-11:20**

## Coffee Break

**11:20-13:00**

## Modern Defense Systems: Key Technologies and Future Challenges

**11:20-11:50**

Jeff Herd, MIT Lincoln Lab

Trends in Phased Array Technology for Defense, Security, and Space

**11:55-12:25**

Michael Brandfass, HENSOLDT

Latest Trends in Multifunctional and Multiplatform Radar Applications

**12:30-13:00**

Goffredo Foglia, Elettronica SpA

Electro-Magnetic Spectrum Operation: Conventional and Unconventional Applications

**13:00-13:45**

## Lunch and Learn: MWJ Industry Session

*Complimentary lunch boxes provided on-site by Microwave Journal*

Leander Humbert, Rohde & Schwarz

Addressing the Test Challenges of Next-Generation RADAR & EW Systems

**13:45-16:00**

## Modern Defense Systems: Key Technologies and Future Challenges

**13:45-14:15**

Myriam Nouvel, THALES DMS

Simulations for Management Optimization of Radar with Artificial Intelligence

**14:20-14:50**

Maurizio Cicolani, MBDA Italy Technical Advisor and Integra System Innovation & Technology

RF High Voltage GaN and Digital Technologies Break Through the Power Barrier to Enable a New Generation of Ultra-Compact System Architectures for A&D Platforms

**14:55-15:25**

Thomas Neff, DLR

Current Trends and Developments in the Field of Spaceborne Reconnaissance

**15:30-16:00**

Laura Anitori, TNO

Radar Innovations for Future Maritime Operations: Challenges and Opportunities

**16:00-16:40**

## Coffee Break

**16:40-17:40**

## DSSF Round Table

*Moderator: Andrea Zanini, Advisor, Presidency of the Council of Ministers*

Maurizio Cicolani, MBDA Italy  
Technical Advisor and Integra System Innovation & Technology

John Cowles, Analog Devices  
Senior Director of Engineering and Technology

Fabio Sterle, Leonardo SpA  
Director of Radar Systems Engineering

Daniela Pistoia, Elettronica SpA  
Corporate Chief Scientist – Head of Technical Directorate

Andrea Pompili, CY4GATE, Chief Scientist

Sponsor:

ROHDE & SCHWARZ

**Amplitech**

Stand E17

Stand Personnel: Jorge Flores, Tim Gallaher, John Pastore

AmpliTech designs, develops and manufactures custom leading-edge RF components for the Commercial, SATCOM, Space, and Military markets. These designs cover frequencies from 50 kHz to 44 GHz. AmpliTech also has developed new products for the 5G/6G wireless ecosystem and infrastructure, Quantum Computing, SATCOM Low Noise Amplifiers, UAVs, Radars, and virtually all communications applications with unparalleled performance and with cutting edge technology. We continue to blaze trails in our commitment to enable and accelerate the arrival of true 5G/6G architecture and contribute to the U.S. being the leader and first to reach the coveted position of Quantum Supremacy. Advanced IP, Service and Quality are our best assets to give customers the best competitive edge possible. Our goal is to improve everyone's quality of life for the 21st century and beyond.

Stand B22

Stand Personnel: Christian Sattler, Enrico Brinciotti, Ferdinand Gerhardes, Stefano Balzarini, Zuzana Magic

Anritsu Corporation has been a provider of innovative communications solutions for 120 years. The world leading test and measurement solutions include wireless, optical, microwave/RF and digital instruments, and monitoring systems, that can be used during R&D, manufacturing, installation, and maintenance of Telecom networks. Anritsu supplies a wide range of leading edge RF and Microwave test solutions operating at frequencies up to 750 GHz. Product lines include Vector Network Analyzers, Spectrum Analyzers, Signal Generators, Power Meters, including benchtop and handheld units.

Am Belvedere 10, 1100 Vienna, Austria

Email:

Website: [www.anritsu.com](http://www.anritsu.com)**Antenom Antenna Technologies**

Stand F30

Stand Personnel: Umut Bulus

Antenom Antenna Technologies has created a new concept with reusable block-based microwave component and antenna design methodologies called Anten'it. This concept is useful in antenna and microwave training and research at the universities. Antenna and microwave engineers working in the industry use the products for rapid prototyping and test their ideas rapidly. There are 3D CAD models of the antennas and microwave components which enables them to be imported into any electromagnetics simulation tool and design complex structures.

**2023 IEEE MTT-S  
INTERNATIONAL  
MICROWAVE  
SYMPOSIUM**

**11–16 JUNE**  
SAN DIEGO CONVENTION CENTER  
SAN DIEGO, CALIFORNIA

## Join Us in San Diego and Experience the Coolest Ideas Under the Sun!

**IMS2023** is the centerpiece of Microwave Week 2023, which includes the RFIC Symposium ([www.rfic-ieee.org](http://www.rfic-ieee.org)) and the ARFTG Microwave Measurement Conference ([www.arftg.org](http://www.arftg.org)). It is the world's largest technical symposium and industry exhibition for MHz through THz professionals. IMS2023 will feature an exciting Technical Program that complements this year's theme of Coolest Ideas Under the Sun – think high efficiency, thermal management, model-based design, space and aerospace systems, and so much more!

### IMS2023 Conference Themes

At IMS2023, we will have several focus themes to highlight a number of areas of RF and microwave engineering that are of topical interest or impact. These themes are:

- Systems & Applications
- Space
- Biomedical Applications
- RF & Microwaves in Latin America

Interested in participating in IMS2023  
as a speaker, attendee or exhibitor?  
Scan the QR code to sign up for updates.

For more information: [ims-ieee.org/ims2023](http://ims-ieee.org/ims2023)

**Micreol**

Stand A37

Stand Personnel: Danilo Lauta

Micreol is a Representative Company with more than 20 years of experience in the electronic components for Space, Defense and Telecom. We believe in the long-term partnership. UMS designs, manufactures leading edge RF millimeter-wave components for applications such Defense, Security, Space, Telecom, Automotive, Industrial. Our in-house GaAs and GaN technologies offer state-of-the-art performance. Our Processes are available in foundry mode. UMS offers full catalogue products up to 100GHz on GaAs, GaN, SiGe, CMOS technologies, in bare die, QFN leadless package

Stand C26a

Stand Personnel: Steve Van Dyke, Sharon Van Dyke, Tom Janzen

Microwave Applications Group (MAG) became a California corporation in 1969 with the goal of supporting electronically scanning antenna (ESA) technology and other technologies where routing of RF signals is accomplished electronically.

Towards this goal, MAG develops ferrite-based components and subsystems, and other RF components and assemblies, to bring ESA systems and other RF devices to reality.

Stand C15

Stand Personnel: Fabio Bianchi Martina, Marco Giuliano, Quirino Magistro, Gianfelice Aricò, Gian Carlo Giuliano

M.P.G. Instruments, founded in 1984, is active in the field of Civil&Military Telecommunications and Aerospace Avionic Systems Testing. The company has based its activity on electronic test equipment commercialization, taking care of customization and defining accuracy standards based on specific requirements of the reference customers. M.P.G. Instruments is structured to be able to guarantee up-to-date products and customizable services to its customers, to ensure: - Constant technological innovation; - Prompt technical assistance; - Accurate maintenance and calibration services

**Via Raffaello Nasini 13, 00156 Roma (RM)**Email: [mpgmi@mpginstruments.com](mailto:mpgmi@mpginstruments.com)Website: [www.mpginstruments.com](http://www.mpginstruments.com)**MPI Corporation**

Stand E12

Stand Personnel: Stojan Kanev, Anderj Rumiantsev, Matthew White, Fabrizio Cagnin

MPI Corporation offers complete Test Solutions based on a variety of engineering probes systems, RF probes from DC-26 GHz to DC-220 GHz, and QAlibria® - the unique RF calibration software. Major products focus on applications such as RF and mmW, Device Characterization for modeling and process development, High Power and many other complex semiconductor test applications.

**No. 155, Chungho St., Chupei City, Hsinchu County, Taiwan 30267**Email: [ast-systems@mpi-corporation.com](mailto:ast-systems@mpi-corporation.com)Website: <https://www.mpi-corporation.com/ast/>**MTR srl**

Stand D8

The M.T.R. operates in the electronic, electromagnetic and mechanical processing sector since 1962. After more than 40 years of activity, the company has gained sufficient experience to be among the major manufacturing companies in the sector. The M.T.R. mainly operates in the design, analysis and development of documentation and production of professional cabling, RF microwave components oriented to highly qualified supplies in the following sectors: Missile, Telephone, Radar, Aeronautics, Railways, IT, Underwater. The company provides: Electronic and electromechanical design for military equipment; Precision mechanical processing: Field cables and radiofrequency cables; Wire Wrap Termopoint cabling; Assembly of LV and At cabinets and continuity tests; Connectorization, installation and assembly of wiring at external sites and on military aircraft; Microwave parts (guide sections, filters, couplers, transitions); Professional magnetic components ,inductors, transformers".

## M-Wave Design Corporation

Stand E17

Stand Personnel: Ken Boswell, Tim Gallaher

M-Wave Design was founded in 1988 to design and manufacture waveguide hardware for a group of loyal customers. Over the years our products have expanded to include Adapters, Transitions, Terminations, Isolators, Circulators, Couplers, Filters, and other passive components in Waveguide and Coaxial configurations. We also offer "super-components" containing integrated functions for increased efficiencies at lower cost. We specialize in small run custom microwave components with superior performance and competitive costing. We support our customer's needs from "one-off" requirements for a test set or evaluation, through large quantity production support. Our job is to "make your job easier", by providing the building blocks to exceed requirements.

## OML, Inc.

Stand E17

Stand Personnel: Tim Gallaher, Yuenie Lau

January 15, 2022. OML, Inc. celebrates 31 years in the millimeter wave industry after opening its doors in 1991. The company, first started by Chuck Olsen, has built a strong name in the industry with its products in test & measurement. Known for reliable products, strong partnerships and excellent technical support, OML strives to continue this tradition. With long standing partner relationships with Keysight, Anritsu and RST it has allowed OML to reach customers all over the world. Focusing on innovation, with Yuenie Lau as current President, OML continues pushing to not only bring forward cutting edge new products but also to provide their customers with the best possible solutions for their applications.

## Optenni Ltd

Stand F28

Stand Personnel: Jussi Rahola, Jaakko Juntunen, Olli Pekonen

Optenni Lab™ is an RF Design Automation software platform that can optimize both antenna-related and circuit-related quantities. Optenni Lab can dramatically speed up the design of complex antenna systems by automatic matching circuit synthesis and optimization, antenna array beamforming and active impedance control. Optenni Lab also contains many assessment tools to evaluate a multitude of antenna design candidates at lightning speed. Our software links with major EM tools, and is typically applied in the design of tunable and multiband antenna systems and phased arrays.

**S2P**

Stand A20

Stand Personnel: Mael MOGUEDET

S2P miniaturizes smart systems by integrating electronics functions directly on 3D complex plastic parts. From requirements to production, S2P covers the full value chain to manufacture 3D antennas, in situ sensors, integrated wires, 3D anti-tampering security devices, etc. Our developments are mainly dealing with the manufacturing of complex 3D antennas, FSS and HF functions, whatever the frequency. RF properties of materials are good and stable, our parts withstand harsh environments, and can be soldered in conventional reflow soldering processes.

Stand Personnel:

Pioneering - responsibly - together. These attributes characterize SCHOTT as a manufacturer of high-tech materials based on specialty glass. Founder Otto Schott is considered its inventor and became the pioneer of an entire industry. Always opening up new markets and applications with a pioneering spirit and passion - this is what has driven the #glasslovers at SCHOTT for more than 130 years. Represented in 34 countries, the company is a highly skilled partner for high-tech industries: Healthcare, Home Appliances & Living, Consumer Electronics, Semiconductors & Datacom, Optics, Industry & Energy, Automotive, Astronomy & Aerospace. In the fiscal year 2021, its 17,300 employees generated sales of 2.5 billion euros. SCHOTT AG is owned by the Carl Zeiss Foundation, one of the oldest foundations in Germany. It uses the Group's dividends to promote science. As a foundation company, SCHOTT has anchored responsibility for employees, society and the environment deeply in its DNA. The goal is to become a climate-neutral company by 2030.
