

Career Projection 23/24 for Bhagath Talluri

Introduction

Welcome to the Career Projection Form.

Talk to your manager about potential Career Projections and define matching development measures. Only completed Career Projections are valid for the following fiscal year. Please note that the Career Projection only applies to Infineon internal employees (local deviations may apply). For more details, see our [Support Sheet](#). More information about the different career tracks and job families can be found [here](#).

You want HR to contact you regarding potentially fitting open positions based on your Career Projections? Give your consent in the [Employee Profile](#) and update it regularly.

Development Measures

Select suitable development measures for your Career Projection(s). Also think about your development goals, what you would like to learn and achieve and define suitable formats to learn. For more details, have a look at our [Support Sheet](#).

Further information about available trainings and formats can be found in our [Training Overview Booklet](#).

Implement the next module design as main designer/technical leader.

Measure of success of the development action is recognition of design community as technical leader/main designer.

Implement the next module design as main designer/technical leader. Measure of success of the development action is recognition of design community as technical leader/main designer.	Not Started	09/01/2023	09/30/2024

General Remarks

Enter general remarks regarding your Career Projections, such as likelihood of realization, potential of the employee, availability of positions and next steps (optional). Additionally visit your [Employee Profile](#) to enter your geographic mobility.

Bhagath has demonstrated his capability to work in a very structured way in the design and tuning phases of the PAM-B. He has also demonstrated his capability to interface with the different technical teams (multi-discipline and multi-sites). Thanks to his RF design knowledge, his structure and his technical communication skills Bhagath has significantly contributed to the technical achievements of the PAM-B.

We agreed that he would need to further demonstrate his capability to be promoted to GG13 in a new product development, in which he would assume the role of lead designer and technical leader. Due to the current business and organizational uncertainties, the implementation of this plan has to be reviewed with Bhagath's new functional manager.

Signature

I herewith sign off the Career Projections aligned with my manager. Please note that the below comment will only be visible to your managers once the form is completed.
